

WATSON TONIC DIMENSIONS

Tonic can work across many domains from meeting rooms to open plan benching. The center deck is the agile area for building user-driven settings based on function, work style and personal preference. Hand-pick the size, shape and purpose of your bench to complement its intended use. Combine the infill, power, privacy and storage options that cater to your users and your setting.

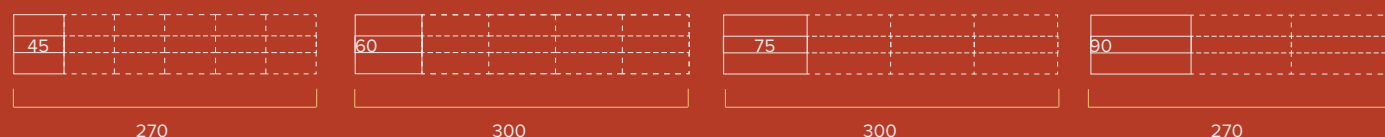

All Bench Segments are two sided and available in 45, 60, 75, and 90 inch modular units:

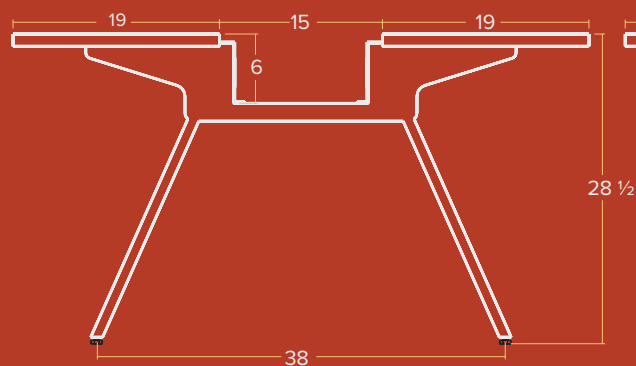

Note — Once a width has been selected all Infill Components must be selected from the same width category

Sizing

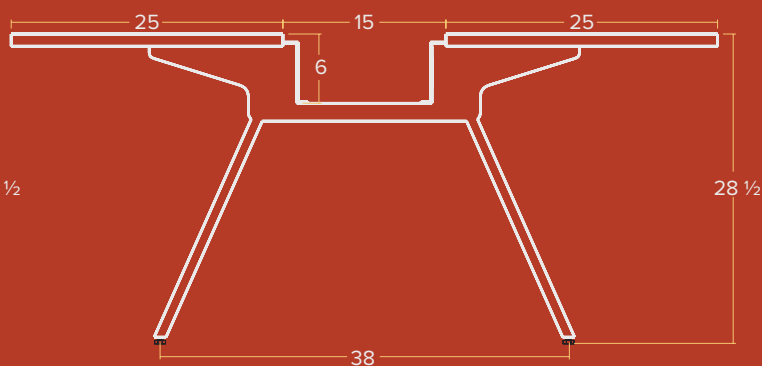

Bench Segments of the same width and depth can be combined to create total segment lengths up to 300 inches.

53 depth

65 depth

Note — With the Infill Components in place each user will have a net surface depth of 24 or 30 inches on the 53 and 65 depth segments respectively.
